Autism Conferences of America

In Collaboration With:

Arizona State University - Autism/
Aspergers Research Program
Autism Research Institute
Autism Society of California
Kirkman
TACA (Talk About Curing Autism)

Minimize Meltdowns with Positive Behavior Support **Dan Davidson, Ph.D., Saturday Keynote**

Positive Behavior Support (PBS) is an evolving field that is helping many people with challenging behavior, and especially those on the autism spectrum. This keynote will provide an overview on how Positive Behavior Support can incorporate a wide array of interventions, all designed to help the learner be successful by making challenging behavior unnecessary. Specific examples of the use of PBS in the classroom and home will be discussed, so that the audience can learn how to implement PBS in those settings to reduce problem behaviors/meltdowns.

Reduce Sensory Related Problems **with Sensory Integration**

Susan Golubock, M.Ed, OTR/L, Adult with Autism,
Sunday Keynote

All information, from our bodies and the world around us, is processed through our senses. How we perceive ourselves and the world determines how we respond. Discover how those differences in perception can impact on daily living skills, relationships, learning and communication, from an inside perspective. Learn how sensory integration therapy can change those perceptions and facilitate more adaptive responses.

Other Conference Highlights:

- ✓ **Major International Study of Toxic Metals, Oxidative Stress, and Immunology in Autism – New Implications for Treatment – Jeff Bradstreet, MD**
- ✓ **Just Released – Results of 1-year research study of intense ABA program in Arizona! – CARD**
- ✓ **Yoga and Relaxation methods to reduce anxiety, aggression, and tantrums!**
- ✓ **Teaching children with moderate or severe autism**
